

The Cherry Ratings.

Cherry mag July 2009

We reviewed some products by [Pink Hibiscus](#) in our last edition. We are lucky enough to be able to test another of their delightful products this month, and that is the Eyelights Eye Balm.

This is another winner. I believe that every woman should have a pot as her secret weapon. This balm is enriched with Cucumber and Chamomile extracts. It also contains Vitamins A and E.

The balm is light and easily spreadable which is essential when working on the delicate eye area. The cucumber is soothing and cooling which would be great in summer, too.

The balm is unscented so will not cause irritation to your eyes.

We think you should all have a secret stash of Eyelights Eye Balm especially for those mornings when you are feeling a little sluggish. Great value, like all the Pink Hibiscus products, at only \$18.

Definitely a 5 Cherry winner.
